

MEAGARD II

HIGH QUALITY,
STABLE AND VERSATILE

DRAINAGE SOLUTION FOR HOME AND GARDEN
DRAINAGE CHANNEL BODY MADE OF HIGH QUALITY POLYMER CONCRETE

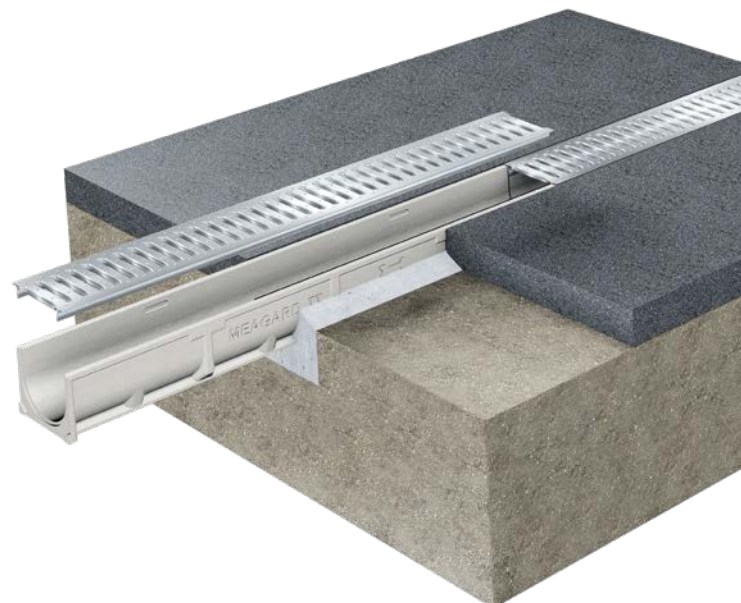

MEAGARD II

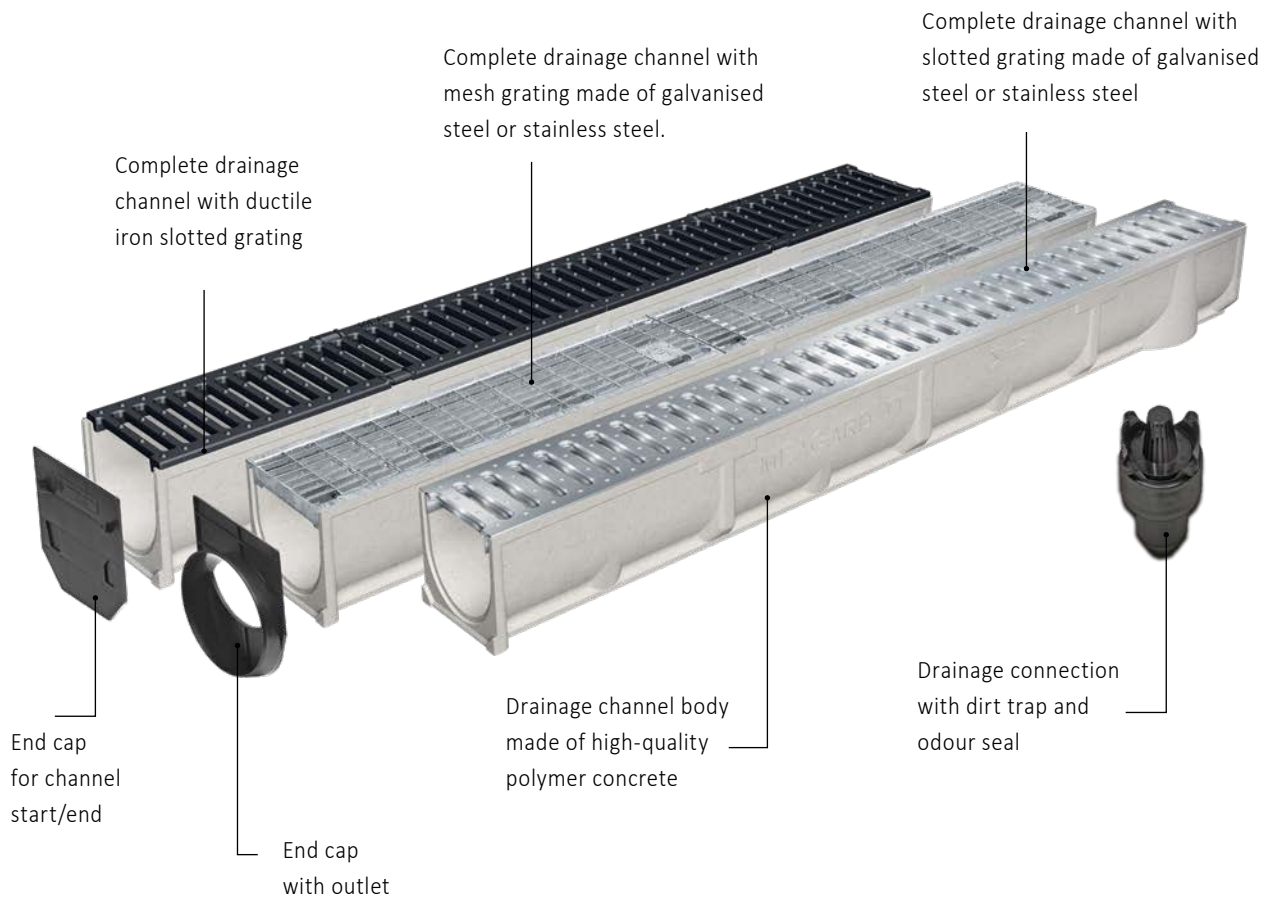

PERFORMANCE WITHOUT COMPROMISE

MEAGARD II MADE OF POLYMER CONCRETE

The channel system MEAGARD II made of high-quality polymer concrete is ideal for use around the house and garden. MEAGARD II is extremely robust, resistant to frost and weatherproof. The polymer concrete channel body consists of 90% of mineral components and is therefore environmentally friendly and recyclable. MEAGARD II is also available with an integrated outlet for a faster and safer connection to the waste water system. A wide range of edge-covering gratings as well as an extensive range of accessories round off the portfolio.

- > For home and garden applications
- > Loading class up to B 125
- > With edge-covering gratings

System overview:

- > Drainage channel made of polymer concrete
- > Nominal width: 100 mm

Grating variants:

- > Slotted grating made of stainless steel
- > Slotted grating made of ductile iron
- > Slotted grating made of galvanised steel
- > Mesh grating made of galvanised steel

Length:	500 / 1000 mm
Construction width:	130 mm
Construction height with plastic slotted grating	110 / 115 mm
Construction height with plastic slotted grating	127 mm
Weight without grating:	6,3 kg
Slope type:	Water level slope
Loading classes:	Car passable, loading class up to B 125* with plastic slotted grating and ductile iron slotted grating

* bonded construction method for the adjacent pavement
