DRAINAGE SOLUTION MADE OF RECYCLED PLASTIC

ECONOMICAL, ECOLOGICAL AND EASY INSTALLATION

MEAPARK LIGHT AND ELEGANT

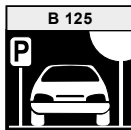

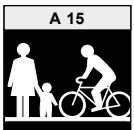

MEAPARK ECONOMICAL, ECOLOGICAL AND EASY INSTALLATION

MEAPARK channels are made of high-quality recycled plastic (polypropylene copolymer regranulate), are ecological (recyclable, free of asbestos and heavy metals) and enable easy installation due to their low weight. MEAPARK channels are available in a construction length of 1000 mm and can be shortened on site. They are suitable for drainage around the house, in garage entrances, on footpaths and in landscaping. Matching end plates and drain sets are available as MEAPARK accessories. A wide selection of different covers rounds off the portfolio. With MEAPARK you receive the perfect drainage solution for all applications around the house at an excellent price/performance ratio.

Loading classes:

Easy and fast installation thanks to plug connections (tongue and groove system)

optimal anchoring in the concrete bed

MEAPARK

- > Channel body without fall made of recycled plastic
- > Clear width: 100 mm
- > Optimum channel cross-section
- > Easy shortening
