box and foul-air trap

## MEAGARD II (POLYMER CONCRETE)

High-quality polymer concrete drainage channels for home and garden are frost-proof, easy to install and simple to maintain. They are available with mesh grating, slotted grating made from galvanised steel, stainless steel or cast iron, as well as with individual MEA Beauty design gratings in a selection of over 200 colours. Eco and climate friendly, as the building material contains approximately 90 % mineral aggregates. Can be re-used in road buildings.

- ✓ For home applications, gardening and landscaping
