FLEXIBLE AND
PERFORMANT

POINT DRAINAGE FOR YARDS AND GARDENS
MEAGARD YARD GULLY MADE OF POLYMER CONCRETE

MEAGARD YARD GULLY

The yard gully at a glance

- ✓ Fully fledged system with odour trap and sediment bucket
- ✓ Large choice of accessories: compensating and extension elements for height adjustment

Covers:

- ✓ Ductile iron stacking frame (B 125)
- ✓ Mesh grating (B 125)
- ✓ Overlaying mesh grating (suitable for passenger cars)

Perfectly designed for point drainage in yards, gardens and around the house: the MEAGARD yard gully made of polymer concrete with ductile iron and galvanized steel covers.

Length:	300/282 mm
Width:	300/282 mm
Height:	452/427 mm
Weight with ductile iron grating:	32,40 kg
Weight with mesh grating 20/30:	30,40 kg
Weight with overlaying mesh grating:	23,10 kg

The MEAGARD yard drain is used where the requirements for a line drainage system are not given. Thanks to its perfect geometry and the optimal outlet size, the MEAGARD yard gully is the perfect and safe point drainage solution for house and gardens.
